OLSTONE

YOUR PARTNER FOR THE STONE TECHNOLOGIES

OLSTONE is a company which was born to work as a **"bridge"** between the best Italian and European companies suppliers of technologies and plants, and the customers interested to invest in the natural stones quarrying and processing industry.

OLSTONE is a serious and professional company, including dynamic specialists, who developed a consistent technical and commercial experience in the stone industry at a worldwide level.

OLSTONE is also very much concentrated in the great Ex-Soviet Union market, which is extremely rich in world class marbles, granites and natural stones and is today extremely interested in the acquisition of modern technologies and know how for the exploitation of the local stones to follow the big local construction and reconstruction development.

OLSTONE very actively cooperates with the most famous Italian and European suppliers for the natural stones quarrying and processing machines and technologies at worldwide level.

This very strict collaboration with the best and most advanced technology suppliers, allows **OLSTONE** to propose to its customers the technical solutions most efficient, modern and cost-effective today available in the market for any specific production requirements.

OLSTONE can then be considered as a professional and qualified partner for the development of new projects and the supply of machines and plants.

In the **OLSTONE WEB SITE**, the section "[STONE TECHNOLOGIES](#)" has been particularly studied and developed to guide and show to the new companies and investors, who approach the stone industry for the first time, what is today technically available to quarry and process natural stones.

On the other hand, the section "[MACHINES AND EQUIPMENTS](#)", is addressed to the companies and persons already expert and active in the stone industry, who are looking for specific machines and technologies or for an updating about technical news.
